For each person who touches your cats, you will add those dates in this column. Example: Cari will be present at your intake, and all vaccine dates.

CFFR is REQUIRED by the state of Colorado to keep this log for ALL kittens that come to us from out of state and are too young to have received rabies vaccination. The purpose: if any of your kittens were to contract rabies after arriving in the state of CO, CFFR would need to submit this log to the Board of Health so that they can contact every single person that touched your kitten and on which dates.

If you take your kittens for spay/neuter surgery at either HSSPV or Monarch, you will also need to add the surgery center and staff names who came into contact with your kittens that day. The front desk can give you these names.

If Duffy met Hall and Oates on 5/8 and was adopted by them and went home on 5/12, you will list those dates as above. When Duffy leaves, submit this rabies log to info@coloradofelinefosterrescue.org (or text it to your CFFR group text) so it can be filed away for Duffy. Then continue the log for the other cats you have, listing everyone who touched them, until those cats are also adopted. Submit the rabies log after each of your cats goes to their adoptive homes.
